CAVEAT EMPTOR

There are many books on the market about men's style. In fact, you can go to any bookstore and be greeted by 5 or so, all virtually identical, all which are promising a definitive guide to dressing well.

Conservative styles have been developed over hundreds of years to effortlessly flatter a man's body. As such, men's style books tend to believe that every man who is learning about style or fashion should first start by dressing conservatively.

I agree wholeheartedly, with one simple caveat. Aside from simply following the rules: You should also know how to break them.

Once a man understands the fundamentals of style, he'll often begin to feel quite restricted. He'll begin to crave deviation; to experiment with clothes in a way that truly makes a statement.

This text addresses all of the same things as the aforementioned one-size-fits-all books do: how to tell if things fit, how to discern between good and bad clothes, how to put outfits together.

It focuses on a wardrobe based around versatility, and on the way you wear clothes and how they affect the way you look. And above all, it focuses on helping you choose clothes that can be worn in many different outfits as your style develops.

There are no clear-cut rules on what the right clothes are for any specific man, or when he should wear them, aims to give you all the necessary tools to build a style that is, above all else, yours.

- JAMES GALLICHIO

AUTUMN

You have brown, red, or golden blonde hair; pale peach, beige or golden brown skin. and have dark brown, green or blue eyes

WINTER

You have dark brown or black hair; pale white, olive or dark brown skin and you have dark or deep brown eyes.

SHOPPING FOR YOURSELF

The first step is to decide on a style that fits you. Some Examples include:

Business casual / Preppy / Daper / Outdoor / Casual / Streetwear / Metal / Punk / Avant-garde

These are generic styles, and you may find that a combination of styles fits you better than just one. Most men aren't defined by one particular style.

This is why versatility is key; a man's wardrobe should be full of clothes that can be worn in a variety of styles, rather than forcing him to dress one way for the rest of his life.

A common style mistake is wearing colours that don't match your complexion. Every man has colours that look bad on him. They wash out his skin, make him look older and accentuate his blemishes. Most often, we avoid these colours on an unconscious level, as they make us feel genuinely uncomfortable.

Look in your wardrobe and take note of the colours of the items inside it. Are there any colours that are prevalent? Are there any colours that are noticeably missing?

Your natural colour palette is composed of the colours of your skin, eyes and hair. Each palette has colours that naturally compliment it, making you look younger, lively and draw attention away from skin blemishes.

SUMMER

You have blonde or brown hair; pale white, olive or dark brown skin; blue, green or hazel eyes & a cold undertone to your skin

SPRING

You have blonde, or auburn hair & light, ivory skin. You have light blue, or green eyes and , a warm undertone to your skin

Most men have colour palettes that fall into one of four groups, categorised into style by seasons: Winter, Autumn, Summer and Spring.

For men who have a good eye for colour, choosing clothing that naturally compliments your palette is easy – just buy clothes whose colours make you feel comfortable, relaxed and at ease.

For others, who need a bit more direction, there are entire books on the subject.

- G. PANT LENGTH
- H. SHOE SIZE (US)

MEASUREMENTS

Becoming a better-dressed man is infinitely easier when you know what your actual sizes are. For the following exercise you will need a simple tape measure plus a pen and paper to write your true measurements down.

Fold them up and put them in your wallet. When taking these measurements, the tape measure should be snug, not constricting.

SHOULDER WIDTH

The width of the shoulder on jackets and coats. It's difficult to alter, so it's essential you get the right size the first time around.

CHEST WIDTH

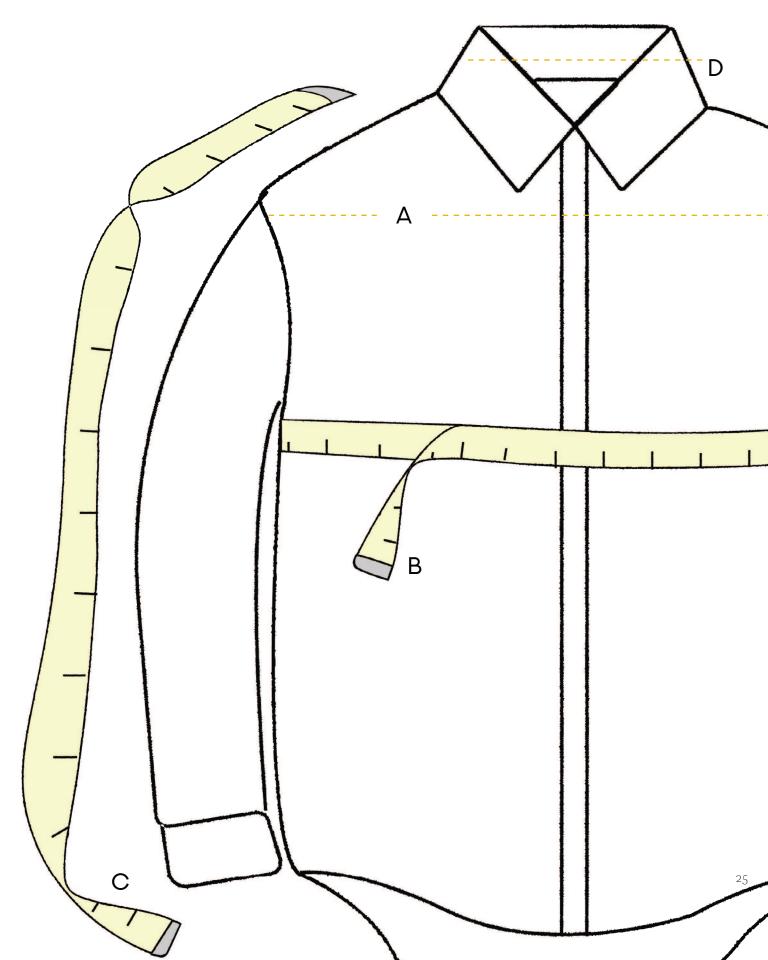

The breadth of your chest dictates the width of the shoulder on jackets and coats, making it one of the most important measurements for a man.

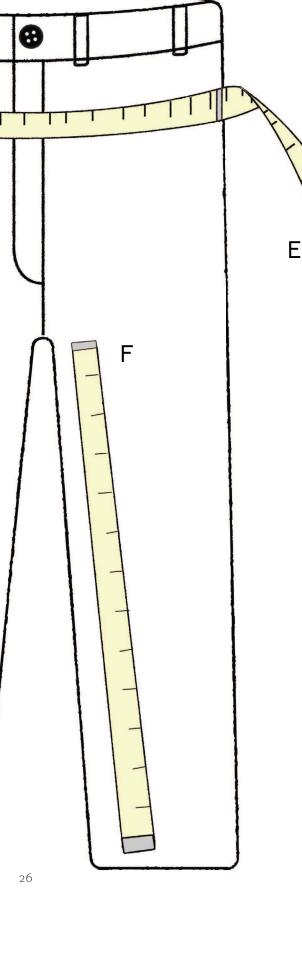

SLEEVE LENGTH

It helps to know your sleeve size to save yourself a trip to the tailor. To do this, measure from your shoulder to the beginning of your wrist.

NECK SIZE

This is the most important size to know when buying shirts. Place the flat tape measure all the way around your neck, or 1" below your Adam's apple.

WAIST SIZE

This measurement is taken at the thinnest part of your torso, usually one inch or so below your belly button and the place where most dress pants will sit.

INSEAM LENGTH

When pants give two measurements, like "30x32", this indicates a size 30 waist and a 32 inch inseam. The inseam measurement is important as it gives an indication of where your pant leg should end, and is essential for tall men who need at least a 34" inseam.

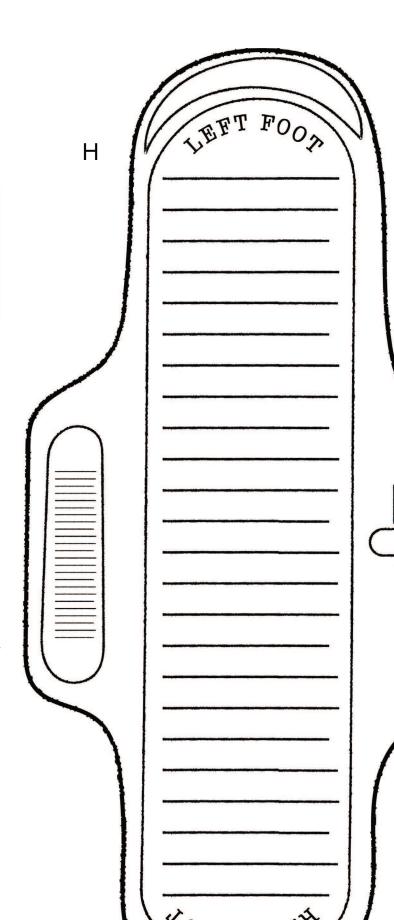

G

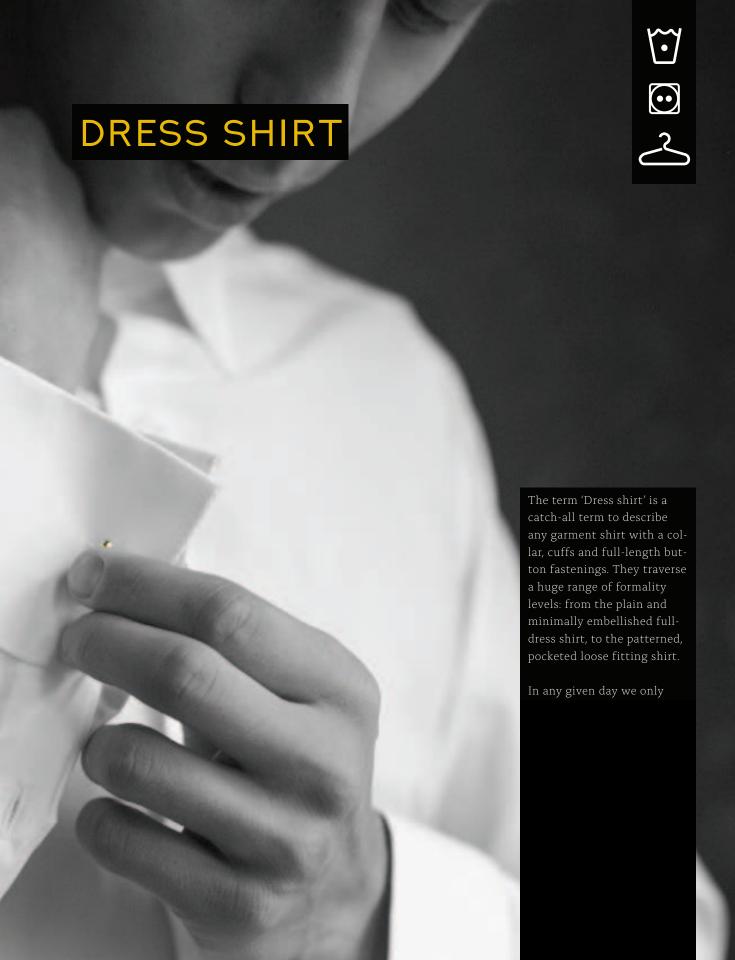

Pant Length: This measurement is best taken with the help of a friend, who will measure from the bottom of your crotch to the base of your heel.

Shoe Size: The best way to tell your shoe size is to use a Brannock Device (above). These are found in almost all shoe stores and can tell you the length and width of your foot. Be sure to measure both feet, as one is often slightly bigger than the other.

COMME DES GARCONS

French for "like boys", is a Japanese fashion label founded by and headed by Rei Kawakubo. Comme des Garçons is based in Tokyo and also in the prestigious Place Vendôme in Paris, the city in which they show their main collections during Paris Fashion Week and Paris Men's Fashion Week.

Established in 1969, Comme des Garçon became successful in Japan in the 1970s; a menswear line was added in 1978. In 1981 saw Comme des Garçons's debut show in Paris. It created a splash for its predominant use of black and distressed fabrics.

Throughout the 1980s, Comme des Garçons's clothes often were associated with a 'distressed' & 'punk' style. CDG' designer fashion lines are designed and produced in Japan. Lines including Comme des Garçons Comme des Garçons, Comme des Garçons Noir, Comme des Garçons Homme, Comme des Garçons Plus, Comme des Garçons Man, Comme des Garçons Deux and Comme des Garçons Shirt, are all handmade.

This is because Comme des Garçons adamantly values the quality of hand-made garments, reflected in the more expensive price and longevity of their products.

HOMME STAFF POLO / Spring 1989

1989
COMME des GARÇONS
HOMME

Play, the company's luxury casual streetwear line, is mainly produced in Japan, Spain, and Turkey, with France's Play factory still utilizing many hand-made procedures as opposed to Japan, Spain, and Turkey's production line factory. This is because France's factory also produces hand-made only lines, including Tricot Comme des Garçons, Comme des Garçons Homme Plus Evergreen, and Junya Watanabe.

It is believed that all fabrics are produced in Japan, but some China and Australia sold pieces are hand-finished in France for quality control purposes, distinguishable by the hand stitched heart emblem.

Signature Comme des Garçons boutiques are located in London (Dover Street Market), Paris, New York City, Beijing, Hong Kong, Seoul, St. Petersburg, Tokyo , Kyoto, Osaka, Fukuoka. The company also maintains concessions at select department stores, such as Isetan. In Paris, a Comme des Garçons perfumery can be found at 23 Place Marché St-Honoré.

Rei Kawakubo / Comme des Garçons Art of the In-Between

INFINITY OF TAILORING EXHIBITION / Autumn 2013

Starting in May 2017, Rei Kawakubo will be the subject of one of the Metropolitan Museum of Art's fashion exhibitions in New York. Vogue magazine and the Metropolitan Museum in New York have announced that the exhibition dedicated to Kawakubo is scheduled for its 2017 season between the fourth May 2017 and the fourth September 2017.

In an interview with Vogue in April 2017, Andrew Bolton, the curator for the Kawakubo exhibit at the Met stated: "I really think her influence is so huge, but sometimes it's subtle. It's not about copying her; it's the purity of her vision... Rei was really involved in the design of the exhibit." Bolton also stated that the exhibit in May 2017 will be an austere, all-white maze hosting approximately 150 Comme ensembles.

THE ART OF INBETWEEN EXHIBITION POSTER / Summer 2017

Rei Kawakubo's fashion-as-high-art genius is never not on display at Comme des Garçons', whether she's exploring new silhouettes that distort the human body or challenging conventions of what a piece of clothing even means or has to be.

There's the omnipresent CdG Play striped tees that, other than their instantly-recognizable heart logo, are about as basic at it gets.

Then there's the brand's collaborations with Nike and Converse that put tweak classic sneaker silhouettes like the Blazer and Chuck Taylor. In fact, wearability has been a cornerstone of the brand since Kawakubo and co. started producing menswear.

CDG PLAY CONVERSE HI / Winter 2016

BUTTON

a small disk or knob sewn onto a garment, either to fasten it by being pushed through a slit made for the purpose, or for decoration

FABRIC

cloth or other material produced by weaving cotton, nylon, wool, silk, or other threads together

MIND YOUR PATTERNS

Shirts are the first piece of the menswear puzzle, and are the closest item worn to your upper body. The term 'shirt' is comprises of any cloth garment worn as the bottom layer on the upper body.

From dress shirts worn with suits to more casual shirts worn with jeans, shirts traverse all forms of menswear and have a place in almost any outfit imaginable. When considering the formality of a shirt, compare it to the full-dress shirt used in black or white tie outfits.

Embellishments such as pockets, colours, patterns, different cuff styles, long collars and epaulettes all serve to make a shirt less formal.

ഗ

ш

□

Most people simply refer to a shirt by the pattern it holds or the fabric that is used to produce it; while there are indeed specific names for different styles of dress shirt, it is far more useful to know the different components that comprise them.

TARTAN PLAID
Fall 2014

a pattern consisting of criss-crossed horizontal and vertical bands in multiple colours. Tartans originated in woven wool, but now they are made in many other materials.

VERTICAL STRIPES
Autmn 2014

Wearing vertical stripes makes you seem taller and in horizontal hoops, you'll look wider. But its a classic boat or bussiness style shirt.

RAYON (PRINTED + PATTERNED)
Spring 2009

a kind of garment formed of geometric shapes images and typically repeated like a wallpaper. This includes screen printed or woven patterns.

CONTRAST COLLAR

Spring 2011

A shirt with cuffs + collar, normally white, that are different colours to the body, accenting its the collar end sleeve ends of the shirt.

GINGHAM

Spting 2013

Gingham is a medium-weight balanced plain-woven fabric made from dyed cotton or cotton-blend yarn. It is made of carded, medium or fine yarns.

CLASSIC WHITE

CDG x Supreme Spring + Summer 2013

a classic white dress shirts to give you that clean and timeless look an essential for any wardrobe you can think of.

DENIM Summer 2006

a sturdy cotton twill fabric, typically blue, used for jeans, overalls. They get better over time & more washes, soon it wll be your favorite shirt.

NECK

the collar should fit snug whether it remains open or stays closed

TORSO

the buttons lie flat and fabric does not pull between them

SLEEVES

The cuff should fall between the crook of your thumb at the base of your wrist

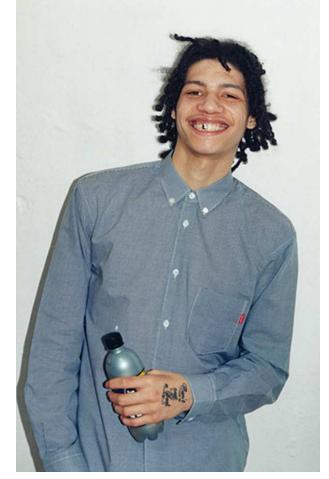

LOOSE COLLAR FITTING / CDG x Vetements 2016

A dress shirt's size is almost always dictated by the size of the neck. Thus, when shopping for a shirt simply take the neck measurement you took in Part 1 of this book (in inches or cm, depending on where you are from) and find a shirt with a corresponding neck size.

When trying on a dress shirt, button it up all the way to the top. The collar should be snug but not constricting – you don't want to choke yourself. The shoulder seam should be as close as possible to your shoulder joint, and the sleeves should reach the crease on your hand where your palm meets your forearm.

Sleeves should be loose enough to allow movement and to not show your muscles beneath, but tight enough that there is no billowing fabric. Around your torso, the shirt should be snug with little to no billowing fabric but not so tight that it restricts movement.

CDG X SUPREME / Spring + Summer 2013

CDG PLAY / Spring Collection

Each execution has a strong impact on the way the shirt fits into an outfit. Most men just wear their shirts in the 'standard' way – sleeves down, with a tie and jacket.

If you've never done so, I strongly encourage you to experiment with your shirts to find out which way you most like to wear them.

These feature dress shirts worn 3 different ways, for different occassions. With the sleeves down, the shirt looks conservative and dressy. With the sleeves rolled to the elbow, the shirt becomes much more relaxed and casual.

With the sleeves rolled to the mid-bicep – quite prevalent 1960s British street style – the arm muscles are exposed, creating a somewhat tough and threatening look. Note, this is not something that men with large muscles should ever do.

Finally, in the last picture, the shirt is opened with sleeves rolled, atop a crew neck t-shirt. This is the most relaxed style of the four and makes the shirt appear airy and free-flowing.

CDG X SUPREME / Fall + Winter 2015-16

A BATHING APE

Bape was founded by Nigo in 1993 in a single store in Harajuku called Nowhere which he opened with his highschool friend Jun Takahashi (of Undercoverism fame). The brand's full name is A Bathing Ape in lukewarm water, and has two meanings. The first and most obvious is a reference to the film Planet of the Apes.

The second meaning refers to the Japanese method of bathing which typically involves water at a temperature above 40 degrees Celsius. To bath in water that has gotten lukewarm after a long period of time is an over-indulgence, a luxury, and thus he is gently mocking the laziness and opulence of the generation of Japanese youths which consume his products.

The brand maintained a deeply underground image by selling at low volumes and not advertising in traditional manners, but a 2001 collaboration with Pepsi spread the brand's image name all around Japan and thrust it into the the mainstream spotlight.

In 2003 Nigo befriended Pharrell Williams of Neptunes/N.E.R.D., which kick-started hip hop's obsession with Bape. This was the first time Bape had ever really been introduced to the US (prior to this Nigo had thought of selling to Americans as too "mass market."

BAPE LIFESTYLE HOTEL / 9 Dongdaqiao Rd, Chaoyang Qu, China

PHARELL WILLIAMS O.G. BAPEHEAD

NIGO, CREATOR & FOUNDER OF BAPE

NIGO, born Tomoaki Nagao, was a devout hip-hop addict, and it was this that served as his introduction into the scene he would later go on to dominate. At 16 he would regularly venture into Tokyo to go record shopping at a store called Cisco, that year managed to save up enough to purchase his first set of turntables.

Enamored with hip-hop and its style, the wannabe-DJ began dressing like the icons he found on record sleeves: people like Public Enemy, LL Cool J and The Beastie Boys became his icons.

After high school, NIGO swapped sleepy Gunma for the neon lights and late-night bars of the nation's capital as he accepted a place at the seminal Bunka Fashion College. However, while he did attend classes, NIGO's

real education was in Tokyo's nightclubs, where he mostly found himself making connections that would further his fashion career more than any lessons in pattern-cutting ever would.

He would later remark that he learned "zero" from Bunka, and the most important thing he took from it was meeting Jun Takahashi, who would eventually go on to found the coveted brand UNDERCOVER.

As a softly spoken individual who had always chosen to communicate in a strictly visual sense, it was no secret that the designer had a weak spot for collecting. Whether it was famous works of pop art by the likes of KAWS, Futura and even Warhol, or rare toys (his Star Wars collection alone was valued at \$250,000), NIGO was a true cult obsessive. And, as his success grew, so did his shopping habits.

Today, NIGO keeps himself occupied with his altogether more refined label, Human Made, which focuses on high-quality vintage reproductions. He also works with Japanese high-street powerhouse Uniqlo as the head of their UT T-shirt line, and has a sporadic collaborative relationship with german brand adidas.

However, while all these projects have merit in their own right, nothing yet has touched the fervent energy that once characterized Bape in its glory years. In many rights, it is a nostalgic longing for those years that still drives much of NIGO's own personal appeal.

BAPE X WARHOL PILLOW / Winter 2016

CASUAL SHIRT BASICS

Here are three types of basic casual shirt, and as with jumpers, they are defined by their neck style: crew neck, V-neck and boat neck. A t-shirt has varying degrees of drape and fitting style.

The neck, the chest and the arms can either be tight-fitting, free-flowing or somewhere in-between.

The way that a basic t-shirt fits your body determines its level of formality; if it's slim and well-fitted – like a dress shirt – then it will be much more formal than a relaxed, drapey variation.

POLO COLLAR

features four to five inches of extra fabric that rises above the collar is generally folded over for a much thicker neckline

RUGBY COLLAR

in a similar style to polo shirts but with a stiffer collar for rigid style

V NECK SOCCER JERSEY Spring + Summer 2016

a neck on a garment that comes down to a point on the throat or chest, resembling the shape of the letter "V"

SOLID COLOR T-SHIRT Fall Winter 2016

any casual shirt with solid colors for a more minimalistic style, choose your colors wisley, often times they make a bold statement

CAMO POCKET TEE

Fall 2012

similar to a breast pocket, this is an embellishment that adds a bit of class to a bland tee, use it for pens, cash etc.

CAMO WAFFLE HENLEY Fall 2015

A Henley shirt is a collarless pullover shirt, characterized by a placket beneath the round neckline, sometimes made with soft textured fabric

BAPE X CHAMPION JERSEY Summer 2016

the ultimate in causal for the sports fan, this with a pair of shorts and you will be ready to ball anytime anywhere

GRAPHIC T-SHIRT

Summer 2017

a printed shirt or graphic shirt is a shirt bearing a design, image or lettering on it. Printing is done with textile or tradional screen printing methods

ONE POINT POLO

Spring 2011

A polo shirt, also known as a golf shirt and tennis shirt, is a form of shirt with a collar, a placket and typically two or three buttons, and an optional pocket

CONTRAST RUGBY SHIRT

Season Unknown

a top of a kind worn by rugby players, having a buttoned collar and typically long-sleeved with broad stripes.

BAPE SIZE TAG

NOT TOO TIGHT

your collar and shirt body shouldn't be too tight, unless you're a british rockstar, its unflattering to most men

SLEEVE LENGTH

even short sleeves need the right fit, shoot for a length halfway to 3/4 between the top of your shoulder and elbow

T-shirts follow a simple "small, medium, large" sizing format. These sizes are far less precise than their formal equivalents, reflecting their relaxed-fitting and extremley casual nature.

A t-shirt's fitting rules vary depending its specific style; if it features a deep neckline and a long, drapey design then it will fit quite differently to a tightnecked, slim-fitting variant.

In general, though, it's best to wear t-shirts whose shoulder seam should fall as close to your natural shoulder as possible. There should be no billowy fabric around your waistline, nor should the t-shirt be so tight that it clings to your body.

Most men find that a t-shirt is most flattering when the arm reaches around about halfway between the top of the shoulder and their elbow.

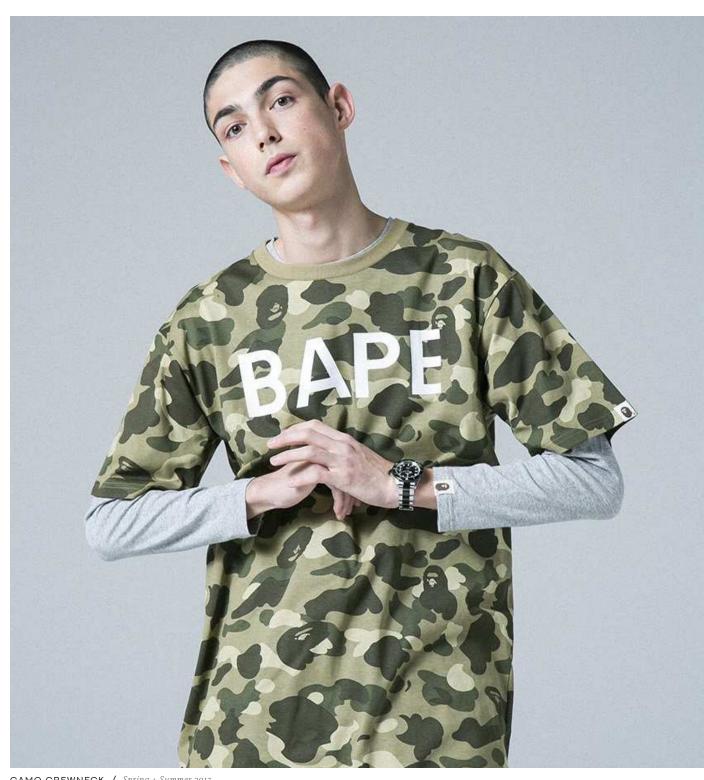

This sleeve-length is enough to subtly accentuate the bicep without brazenly showing it off which is something that muscular men should always seek to avoid

NOT TOO LONG

a t-shirt that touches your knee is a bit outdated, try and keep the length of your shirts toyour waist if not a little bit below

BAPE AMERICA TEE / Spring +Summer 2014

CAMO CREWNECK / Spring + Summer 2017

As mentioned earlier on in this article, BAPE was one of the first fashion labels to create products encompassing every corner of everyday life, allowing streetwear fans to literally live a branded lifestyle.

Beyond clothes and sneakers, the brand has produced kitchenware, furniture, toiletries, fishing hooks, bed linen, skateboards and much more. Nowadays every brand produces wildcard products, from Supreme and Palace all the way up to Louis Vuitton and Comme des Garçons, but BAPE was one of the true pioneers of the "lifestyle brand" concept.

APE HEAD TEE / Spring + Summer 2015

SPACIAL EXPERIENCE

BAPE STORE(R) Harajuku is situated behind Jingumae Primary School. The first floor features their women's clothing lines, and the second, men's. The third floor was refurbished in June 2010, and reopened as the new concept 'shop-in-shop' space Rock and Roll Store Harajuku, developing ever more diverse ways to enjoy the world of the internationally recognized brand.

BUILT TO LAST

From the rail roads to the street scene, over the past 120 years Carhartt have made a credible name for themselves with sought after products and a strong brand ethos: durability, style and quality. Today the Carhartt's still run the business, offering heavy duty garments that promise the same standard of quality to a slightly bigger client base.

They started out producing cotton duck overalls – a heavy woven canvas fabric – aimed at Detroit's blue collar workers. At that time, Detroit was the industrial hub of America, and there was high demand for the utilitarian, heavy duty work wear.

The 'Union Made' label stitched into each pair of Carhartt duck overalls was a guarantee that made the products so appealing to the blue collar work force they were aimed at and cemented Carhartt's quality and reputation among its customers.

This certified that each Carhartt garment was American through every stage of the process from the materials, to the workers producing it. Buying a Carhartt overall meant supporting a unionised workforce that were treated fairly and paid well, an ethos & testament that built the reputation of the brand.

Carhartt's foray into street wear and their support of the independent music and street scene proves they are as current and vital to clothing and culture as they were over a century ago.

In 1994, Edwin Faeh established his project 'Work in Progress' and became the first distributor of Carhartt in Europe.

Before that, Edwin had been working under a title called 'All Ameri-

can Project', which retailed authentic American brands to a much larger European Market.

In a smart move by Carhartt, by allowing a Eurpoean extremity to manufacture and distribute, and then design the clothing for a market he had more scope on allowed the brand a greater bearing.

Soon colours and styles exclusive to Europe were being made.

With the distinct American style of Carhartt, the WIP designs appealed more to the European sensibility.

It was noticed that the label was mainly being distributed to skate shops and independent stores.

Carhartt had evolved from an All American brand into a true staple of street wear.were treated fairly and paid well, an ethos & testament that built its reputation.

Z

 \propto

 \Box

CARHART X STUSSY / Fall + Winter 2015

The '90s saw a rise in interest and popularity for supporting the independent street art and music scene. As urban youth subcultures took off the ground, Carhartt WIP came to prominence as the brand that clothed its dignitaries. Having sponsored the scene, its up and coming projects and stars for years, Carhartt had discerningly implemented an ingenious marketing strategy.

From the off set Carhartt WIP cottoned onto how investing in art and music cultural movements could promote their clothing to a specific following. Combining their endorsement of the scene and Hamilton's original pursuit for high quality, durable clothing, Carhartt WIP have come to the forefront of street and work wear. Collaborations with like-minded projects like Mahogani Music, Vans and Stussy have cemented their relationship and reputation with and within the scene.

In totality, Carhartt WIP is a brand that stays true to their skate and street wear roots with sweatshirts, t-shirts and utility jackets all featuring simple utilitarian design with urban street wear features like bold graphics or the raglan sleeve. With so many brands cropping up on a monthly basis – it's brand such as this, who stay true to their aesthetic and origins.

 \Box

In formal terms, a good pair of pants is one that successfully elongates the legs, making you appear taller; they bring the legs into better proportion with the torso and make a statement of bold power and self-awareness to the world.

Casual styles favour functionality, being comfortable to wear and relaxed in nature. This mirrors the mindset of the man inside them.

More modern, avant-garde designs aim to drape the body in an interesting way. They reappropriate formal styles and re-cut them into a more dramatic style, such as the drop-crotch. Regardless of the style you choose, take careful note: one of the most common mistakes that hampers men from dressing well is wearing the "wrong" pants, where "wrong" means ill-fitting, ill-designed and ill-proportioned.

POCKETS

usually small cloth bag that is sewn into a piece of clothing, a larger bag, etc., and that is open at the top or side to be used for everday storage

Σ

 \circ

Z

⋖

BELT LOOPS

before the 1920s, belts served mostly a decorative purpose, and were associated with the military. Today it is common for men to wear a belt with their trousers.

The most important design difference from one pair of pants to another is the way that the fabric drapes the legs. In men's pants, this 'drape' is put into three different categories: tapered, straight and boot-cut. Tapered and straight-legged pants are always preferred.

Tapered pants have a relaxed thigh and become slimmer toward the calf & ankle.

Straight-legged pants are usually the same width at the knee and ankle, creating a straight, tube-like appearance.

Boot-cut pants are wider at the ankle than they are at the knee, similar in concept to flares. Boot-cut pants are rarely flattering on any man. They distort the smooth and elegant flow of the legs and instead make the ankles look fat and bloated.

WOOL TROUSERS
Fall + Winter 2016

Wool pants and trousers are an essential item because they're the middle ground in fashion between jeans, chinos and a full suit

ட

RELAXED FIT JEANS Spring + Summer 2014

a type of pants, typically made from denim or dungaree cloth. Often the term "jeans" refers to a particular style of pants, also known as "blue jeans," invented by Jacob W. Davis

RIPSTOP CARGO PANTS Fall + Winter 2012

Ripstop fabrics are woven fabrics, often made of nylon, using a special reinforcing technique that makes them resistant to tearing and ripping, ideal for the outdoors or casual events

TRACK PANTS
Winter 2016

Originally meant for athleisure, the iconic ash grey track pants are now available in other colors too and can serve various purposes like lounging or brisk warm up exercises

CHASE SWEATPANTS Spring 2016

Sweatpants are a casual variety of soft havy knit trousers intended for comfort or athletic purposes, although they are now worn in many different situations

CHINO PANTS Spring 2017

Chino cloth is a twill fabric, originally made of 100% cotton. The most common items made from it, trousers, are widely called chinos, & are king of the business casual look

COTTON COVERALLS
Fall + Winter 2015

a type of clothing made in one piece, worn to cover and protect most of the body and for doing some real dirty work

CORDUROY WORK PANT Fall + Winter 2012

Corduroy is a textile with a distinct pattern, a "cord" or wale. Modern corduroy is most commonly composed of tufted cords, sometimes exhibiting a channel like pattern ഗ

Ш

ட

PAINTERS SHORT Spring +Summer 2017

shorts with numerous amount of pockets and holsters for paint, brushes, knifes and other needs of a house or canvas painter

WATER SHORTS

Spring + Summer 2015

a short made of lightweight material, normally nylon or lycra, that can be used for swimming, they key here is that the lighter the short the quicker they will be able to dry

S

STANDARD CARGO Year Round

the short people love to hate, until they get a pair, then there's no turning back

DENIM Year Round

Denim Shorts come in a vast variety of washes with intricate hand-done destruction, a gritty attitude and the perfect fit

BASKETBALL SHORT Season Unknown

an essential for anyone, perfect for realxing, working out, or running errands, not for use in formal situations

The most important factor when buying a pair of pants is the waist measurement.

This is generally what the size of the pants refers to, but as mentioned in the measurement section, casual sizes are generally a few inches below the measured size, so a size 30 waist usually fits someone with a 31.5 - 33" waist.

The way a pair of pants fits varies greatly, and depends heavily on the style of the pant. Some have a relaxed thigh and a tapered calf; others are super skinny all through the leg; others still are cut to drape down dramatically along your legs. The style you choose (and the subsequent way that it fits) is all down to personal taste. Most men have a huge tendency to buy pants that are larger than their correct size.

NATURAL WAIST

your pants should sit on your natural wasit, any higher and you're now rocking dad pants

BREATHING ROOM

once again, leave the skin tight jeans for the rock gods

So here's a good rule of thumb: find the smallest waist size that you can comfortably put on your body. Then try one size smaller to be sure. You want the waist to be as snug as possible, because pants often stretch over time, particularly if they're made from cotton

The second thing to test is the length of your pants. For dress pants, you want the fabric to flow neatly down your leg and have as little bunching as possible towards the ankles. When the flow of the pants is interrupted, it causes a kink in the fabric – called a

"break". Ideally, dress pants should only have one break, usually about halfway between the knee and the ankle.

For casual pants, particularly jeans, the excess fabric towards your ankle causes multiple breaks, which is referred to as "stacking". You can have as much stacking as your tastes allow, but be aware that this is a very informal look and tends to make the legs look shorter than a straight, clean line.

WIP INDIGO JEANS / Year Round

Many men are intimidated by dress pants, assuming that they can only be worn in conservative ways. So take note: just because they are intended for formal wear, this does not mean that they cannot be worn in a casual street style.

Many men wear dress pants with singlets and t-shirts, or seek out dramatic, tapered adaptations that can be worn as part of an avant-garde style.

WORK IN PROGRESS

Carhartt Work In Progress, WIP, just unlocked the doors of its brand new flagship store in New York City's SoHo district. The workwear mainstay's fledgling output is more sizeable than its old shop that was located just around the corner on Crosby Street.

As far as its interior design goes, the sleek boutique is fitted with neon & steel for a modern-industrial look.

PUSHING FORWARD

Nike, Inc. headquartered in Beaverton, Oregon, is the largest & most successful brand of shoes, sports equipment, clothing, & controlling more than 60% of the market and becoming a pop icon. The Greek Goddess of Victory for which Nike was named after seems about fitting for their curretn position in

In 1963-1964 when University of Portland track coach, Bill Bowerman, and Phil Knight, a mid-distance runner joined forces to import and provide low-cost, high tech running shoes from Japan in order to provide alternatives to the German-dominated athletic shoe market. Operating under the name Blue Ribbon Sports, Bowerman and Knight began to sell the Japanese Onitsuke Tiger, now known today as ASICS.

Jeff Johnson, a former rival of Knight, joins the company in 1965 as their first full-time salesperson and sells shoes from the back of his van at local and regional track meets until opening Blue Ribbon Sports' first retail outlet in, Santa Monica California.

JORDAN WINGS POSTER / 1989

The Nike Swoosh is a corporate trademark created in 1971 by Carolyn Davidson, while she was a graphic design student at Portland State University. It was here that she met Phil Knight, who was at the time teaching accounting classes at the university. She was paid an astonishingly low commision of thirty five dollars.

Executives decided that she should see something more for her contributions to the company. Eventually, Davidson would be compensated more robustly, with Nike providing her a substantial pay package in 1983.

Blue Ribbon Sports officially incorporates in 1967 and does business under this name until approximately 1970 when Bowerman's desire to improve on the shoe designs of Onitsuke Tiger and Knight's ambition to do more than simply import and resell running shoes.

Inspiration must have struck Bill Bowerman over breakfast one morning because he borrowed the family waffle iron and pour rubber into to create the prototype for the now famous Nike Waffle Outsole.

This invention led Bowerman and Knight to begin designing other shoes, and the company's new name, Nike, Inc. was born when Jeff Johnson, dreams of the Greek goddess of victory, Nike. A succession of shoes, many based on the waffle outsole follows. Some of the most famous are the Waffle Racer, Air Force One, Air Max 93, Max 95, and Air Max 97.

By 1978, the year Blue Ribbon Sports changed its corporate name to Nike, Jon Anderson had won the Boston Marathon wearing Nike shoes, Jimmy Conners had won Wimbledon and the U.S. Open wearing Nike shoes, Henry Rono had set four track and field records in Nikes, and members of the Boston Celtics and Los Angeles Lakers basketball teams were wearing them. Sales and profits were doubling every year.

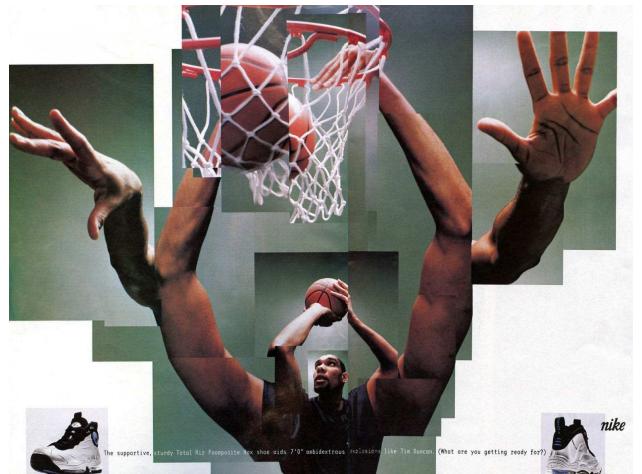

WAFFLE SOLE SHOE REMAKE / 2015

Then in the mid-1980s, Nike lost its footing, and the company was forced to make a subtle but important shift. Instead of putting the product on center stage, it put the consumer in the spotlight and the brand under a microscope, in short, it learned to be marketing oriented, and found great success doing so.

In 1988, Nike launched the first of a series of commercials starring Michael Jordan and Spike Lee, neither of whom had yet reached superstar status in their respective fields.

Mars Blackmon, Lee's over-caffeinated fanboy character, elicited laughs with his complete lack of self-awareness, and Jordan's comparative cool helped him win over a generation of basketball fans.

MERCURIAL SOCCER CLEAT DESIGN \$\(\sum_{\cup} \) 2014

Nowadays, Nike arguably represents what a large part of streetwear today has become: fused with sportswear, incorporating tech elements as functionality becomes more of a defining factor. After all, one of streetwear's fundamental roots is of course sportswear. As well as skateboarding, graffiti culture and hip-hop, street- and sportswear are strongly linked partly because the two share inherent functionality.

For now Nike looks to be firmly Invested in pushing the envelope for technical shoes and sportswear, and applying its best practices to its best selling shoes and classic silhouettes.

HEEL Jordan 1 "Chicago" 2015

a solid attachment of a shoe or boot forming the back of the sole

MIDSOLE

a layer of material between the inner and outer soles of a shoe, for absorbing shock.

TOE BOX

the section of material placed between the toecap and lining of a shoe

TOE CAP

a piece of material or rubber fitted over the front part of a boot or shoe as protection or reinforcement from wear

PRIMITIVE ROOTS

Sneakers are a relative of the runner, which value design over function. They are often sleek and minimalistic and are far more appropriate for casual use than shoes designed for athletics.

The most common sneaker style is the plimsoll, which has a canvas upper and a rubber sole. Common examples include Converse Chuck Taylors also known as "Chucks", Vans Classics and Dunlop Volleys.

ULTRALIGHT RUNNER

Flyknit 2017

KOSTON SB / 2015

NIKE X BODEGA ACG COLLECTION / Summer 2017

Whether a sneaker is 'good' or 'bad' depends on the style of the wearer; if you have a younger style, then loud, bright and over-the-top designs might be right up your alley; if you have a dapper casual style then your shoes might tend more towards a sleek, minimalistic design; whereas if you have a strictly formal or business style then you might avoid sneakers altogether.

The only strict rule I can give, then, is to avoid sneakers that do not fit in with the rest of your outfits. Consider the shoes you buy carefully they completely change the way an outfit looks.

NIKE X VLONE AF1 / 2017

GONE GLOBAL

Nike is known as one of, if not the most dominant apparel brands in the world. With over one thousand retail stores worldwide, its no surprise that Nike is getting close to global market domination. Along with a large volume of stores, Nike often sponsors pop up shops, special boutique and large scale installations for their product, making and Nike store an individual site to be seen. For now we'll highlight some of its most prominent installation locations.

A LOVE SUPREME

James Jebbia, the man who, in 1994, founded and to this day runs the SoHo-based company that has been making clothing and skateboards and a lot of other things that the people who love it absolutely have to have, doesn't think of Supreme the way most people in fashion might, as a brand that started out in a small store on Lafayette Street and has since inched its way to legendary status. He thinks of it more as a space.

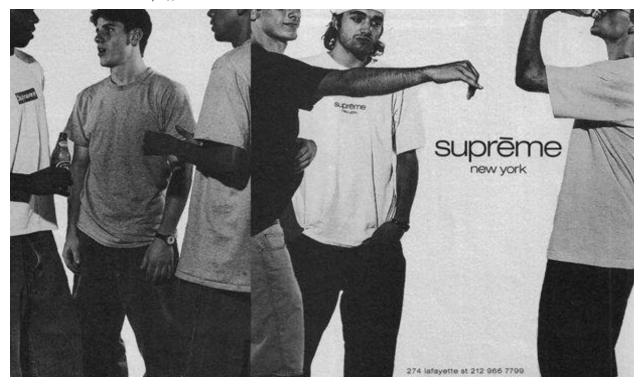

When Jebbia was a teenager in Crawley, West Sussex, in the eighties, working at a Duracell factory, listening to T. Rex and Bowie on breaks and spending his spare cash on trips to London to buy clothes, it was always in a certain elusive kind of store—one that became the model for Supreme."The cool, cool shop,"

His office a few blocks west of the Supreme store is adorned with a skateboard designed by Raymond Pettibon; some drawings by Jebbia's kids, age 8 and 10; and a larger-than-life-size portrait of James Brown—whom Jebbia, crucially, sees as not just the hardest-working man in showbiz but as a guy who never played down to his audience. Jebbia is, likewise, ever-mindful of his customer, who is generally aged eighteen to 25 and wants simply to buy cool stuff—and who will pay for it, assuming it's worth it.

JAMES BROWN TEE / 2013

Nothing about Supreme was planned in advance, its success a coincidence of place, time, and hard work. By the time he was nineteen, Jebbia had left England and was a sales assistant at a SoHo store called Parachute. From there, he worked a table at the nearby flea market, then founded a store, Union, on Spring Street that sold British goods and streetwear.

Union did well enough until it began to sell clothing designed by Shawn Stüssy, the skateboarder and surfer, at which point it did great. Next, Jebbia helped run a shop with Stüssy until Stüssy decided to retire. "Now what the hell am I going to do?" he recalls asking himself.

"I always really liked what was coming out of the skate world," Jebbia says. "It was less commercial—it had more edge and more fuck-you type stuff." So he decided to open his own skate shop on Lafayette Street. Lafayette was then a relatively quiet strip of antiques stores, a firehouse, and a machinist, but also a Keith Haring shop a downtown art-scene connection that, in hindsight, was key.

Jebbia built a bare open gallery like space then brought in skateboards, cranked the music, and played videos, wildly disparate things like Ali fight videos & Taxi Driver to draw people into the store.

The kids he employed, often skateboarders themselves, were cool, opinionated and, yes, often scowling at the uncool, but allowed outsiders a view into their clique.

The very first employees were extras in Larry Clark's film Kids, written by Harmony Korine, who lived in the neighborhood and recalls Supreme as less of a store, more of a hang though within a year, designers from uptown as well as Europe and Japan were paying attention.

 \Box

Z

⋖

 \simeq

Δ

"They were easy adapters to a kind of dissonance, where you have several things at different points on the cultural spectrum that are all connected by a kind of aesthetic or vibe," says Korine. Supreme started a magazine featuring the faces of the young downtown scene—Chloë Sevigny, Ryan McGinley, Mark Gonzales—a mix of models. artists. skaters. "

James tapped into a secret sauce," Korine continues, "and they've kept strong because youth propels the culture, and they are always on the side of the youth. You can't fake that."

Initially, Supreme made only a few T-shirts. Then their customers arrived wearing Carhartt matched with Vuitton, Gucci with Levi's. Soon Supreme tried a cotton hoodie, realizing that if it was simply made a little bet-

ter than what was out there, skaters would be willing to pay a little more for it. According to Jebbia, this sort of thinking isn't unique to skate culture. "Gucci is saying, 'Hey just because you're young doesn't mean you won't love this \$800 sweatshirt," he says.

Jebbia can't say enough about designers who respect young buyers rather than simply use them to attract press. The genius of Alessandro Michele, Gucci's creative director, as he sees it, is that he doesn't just show young people wearing pieces on the runway; he hopes they'll actually wear them as they go about their lives. "He's creating exciting products for right now, today,"

VINCENT GALLO FOR SUPREME MAG / Autumn + Winter 2007

ഗ

The hoodies worked, as did the fitted caps they tried next. Collaborations came early on, with artists making work for skateboard decks, as well as for T-shirts and other clothing. The painter Lucien Smith credits Supreme's intimacy. "A lot of people don't understand that this is a supersmall group of people who are just working on that original idea—that it is a skate shop,"

The list of artists who have worked with Supreme over the last two decades could fill a gallery space: Christopher Wool, Jeff Koons, Mark Flood, Nate Lowman, John Baldessari, Damien Hirst—even Neil Young. But the collaboration that changed everything was the line of tees, shoes, and shirts produced with Comme des Garçons, in 2012. "I think that opened a lot of doors, a lot of eyes," Jebbia says.

"I have never met anyone with such a strong, single-minded vision who has always stayed close to his sense of values," says Adrian Joffe, president of Comme des Garçons and Rei Kawakubo's husband. "That's why our collaboration was so meaningful—and why the growth of Supreme has in a way mirrored our own."

Spend some time with Jebbia and you get to know his own favorite brands, which include well-known names like Patagonia along with a few you are not likely to have heard of, like Antihero, a skateboard company. "They're very below the radar," he says, "but they are very pure in what they do—I hold them in as much esteem as I do Chanel or Vuitton."

I think a lot of brands reach a point where they say, We kind of have a formula—we've got it made," he says. "Our formula is there's no formula."

JEFF KOONS SKATEBOARD DECKS / Fall + Winter 2006

FOUNDER + OWNER JAMES JEBBIA

On one recent morning in his office, Jebbia stepped up from his desk and went out for coffee, passing through the studio from which the new Supreme motorized street bike was about to drop, the latest in the seemingly infinite collaborations.

The space is big and open and white-walled and has the feeling of a workshop. The office staff—an industrious, no-frills team of about 40—is dressed elegantly but practically as they prepare to release their new Comme des Garçons Nike Air Force 1s, the long lines on Lafayette Street still a day or two from forming. Out on the street, he offered a tour through his own history. "Parachute was there," he says, "and Comme des Garçons had a store there...."

Jebbia doesn't have a title. "My wife keeps saying I should just call myself founder, but I don't know," he says. "'Just tell em I run a skate shop' is how I usually put it. But I guess I kind of direct things." He likes to stay out of categories, to be free of market demands. Growth, for instance, is something he is focused on, but at the Supreme pace: slow, but quick enough to satisfy customer demand. "We don't want people to think we are a tricky, hard-to-get brand," he says. "We can only do so many things," he says.

Jebbia is also wary of anything that will raise his overhead or put his ability to take risks at risk. "We're making stuff we're proud of," he says, "not doing stuff to stay alive. I don't think enough people take risks, when you do, people respond music, in art/fashion.

And with that, he's back to being wary. "I've seen brands get comfortable, "but I've never felt comfortable. I've always felt every season could be our last."

HERRINGBONE OVERCOAT / Fall + Winter 2015

SINGLE VS. DOUBLE

Single vs. double breasted is a matter of opinion, mind you that double breasted are more open leaving you vulnerable to the cold on harsh winter mornings

THE MATERIAL

Odds are you will get best use out of an overcoat made from either wool or cashmere. Alpaca and camel are fine alternatives to traditional wools or weaves.

BUNDLE UP

Where formal jackets stress elegance and casual jackets stress functionality, coats place a priority on warmth. A coat is generally seen as 'outerwear'; that is, they form outer layer of the outfit, and are never worn with anything on top of them. Coats can be worn in two ways - casually and formally.

To wear them casually means to buy a coat that fits your exact shoulder size, to be worn with shirts, tshirts, sweaters and anything in-between. To wear

them formally requires that you buy a size up from your regular shoulder size, and wear them as an overcoat atop a formal jacket. Both of the following coats allow for a versatile look one that looks just as good

with jeans & a t-shirt as it does with a suit.

TRENCHCOAT Spring + Summer 2016

A military design first and foremost, this coat has been adapted for civilian use, as it handles the cold and rain well

PEACOAT Fall + Winter 2009

The peacoat now comes in a variety of colors and fabrics. Stick with lean, shoulder hugging versions in classic navy blue, grey or black.

MACINTOSH Fall + Winter 2013

If the weather report says rainy but warm, the Mac is indespensible

TWEED COACHES JACKET Fall + Winter 2009

When a parka is too casual and a camel coat too formal try this alternative, for a functional yet sophisticated look

TOGGLE COAT Spring + Summer 2016

A collegiate staple, the toggle coat can be grown up but stil remains causal for the weekend road trip

Ш

℩

>

Whether your on the sideline or in the stands this long form weather resistant coat will keep you sheltered from heavy rain or powerful wind gusts.

WORKERS PARKA Fall + Winter 2013

High performance jackets help you weather severe storms, even if you are just trekking to the local bodega

PUFFY JACKET Fall + Winter 2012

The puffy or down jacket is back from the dead. Opt for a slimmer more refined silhouette avoid looking kinda fat.

TAPED SEAMS
Spring + Summer 2017

As tech as it can get aside from miltary style jackets, this is the perfect raincaot for hiking trips or a weekend getaways.

All of the same general-fitting rules apply to coats as they do with jackets: the shoulder should be perfectly aligned, the waist should be fitted without constricting movement and the sleeves should fall right around the seam between your wrist and forearm.

They're generally longer than jackets, so for most men anything that ends above the knee is fine. As discussed above, a coat has two general styles of wear: formal coats that sit atop a suit, and casual coats that are worn atop shirts, jumpers and t-shirts. The way that a coat should fit depends entirely on how you intend on wearing it – and, unfortunately, you're stuck with the style you choose.

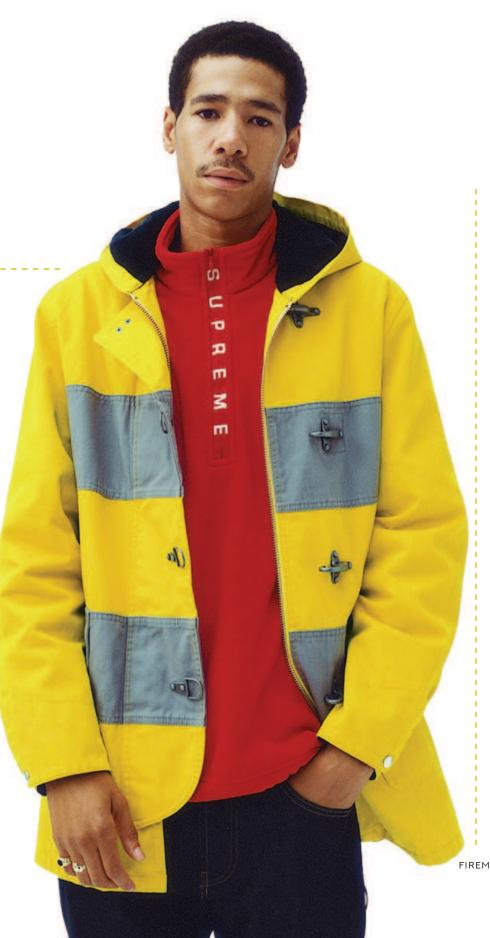

If you want to wear it instead of a jacket: that is, with a simple shirt and tie, sweater, t-shirt, cardigan or similar underneath – then you can follow all the same fitting rules that apply to jackets.

NO BULK

shoulders should be loose enough to go over a suit jacket, but not too wide, thats out of style

SLEEVE LENGTH

you dont want the jacket to ride up on your sleeves, and dont even think about cuffing them

OVERALL LENGTH

there are many lengths to jackets but each style has an optimal length, make sure you size your coat within its limits for your own height Ō

Z

FIREMANS COAT / Fall + Winter 2014

S

 \leq

O

0

Coats and jackets are a big money-maker for retail stores and, next to a suit, are by far and away the most expensive items that a man can buy. But considering the amazing amount of versatility that one single coat holds, their inherent value becomes quite apparent. Beware of cheap workmanship and sub-par construction; the whole purpose of a coat is to provide warmth and last for many years.

Often the most economical course of action is to spend more on a higher-end garment with high construction quality, rather than a cheap coat that falls apart when put through the rigours of everyday use.

RIOT TRENCH / Spring + Summer 2017

SHADOW PLAID OVERCOAT / Fall + Winter 2015

PILE LINED JACKET / Fall + Winter 2014

SLOW BUT STEADY

While Supreme may have started its impressive career in downtown New York, it is slowly expanding due to increased demand and overall popularity. Previsouly Supreme was only available in either its NY and Los Angeles stores, but now with openings in Paris, London, and a few in Japan Supremes reach is far beyond that the small skate shop it once was.

You can expect to feel like you have walked into any contemporary gallery in NY. Upon arrival to any supreme store, similarly you must follow a few rules, the most important one being ,don't touch clothes on the shelves. Take a chance and mess up one of the displays, and you'll be scolded...otherwise have some fun picking out timeless garments from fashions most street savvy brands.

FINAL WORDS

A man's attitude and demeanour vastly improves once he understands the fundamental rules of style.

On more than one occasion, I've put a client in a peacoat and he looks average. Like a man wearing a coat; nothing more, nothing less. But then, when I tell him about the history of the peacoat — about how it originated in 17th century Holland; about how it was adopted by sailors all over the world; about how it used heavy wool that protected a man from the cold sea air while still allowing him to perform heavy duty seafaring tasks — his demeanour changes completely.

His posture change, his attitude changes and I can see that he suddenly feels like he understands fashion. Like he 'gets' it. Like he's wearing the coat, instead of the coat wearing him. This book is about the basics of style; about laying a fundamental groundwork that allows a man to develop his own personal style.

It does not portend to be all-encompassing; there are many key elements of men's style that are simply far too complex for this type of book. However, with the information gleaned from these pages, men who formerly had no understanding or interest in dressing well can begin to feel comfortable about clothes, to garner an appreciation for being well dressed and to discover how to present himself to the world.

As you begin to learn more about men's style you will, without a doubt, transcend advice given here.

Many authors would fight against this – but it should be embraced. Every man should have complete control over the way he presents himself to the world; far be it from me to dictate the way in which you do it! Once you know and understand the fundamentals, the best course of action for developing your style is to observe. Look at other guys; what are they wearing? How have they put outfits together?

What have they done well, and not so well? Observations like this will have a huge impact on the way that you dress; if you see a man who you want to look like, bring your style towards his; if you see a man you don't want to look like, avoid the things he does at all costs. Developing a personal style takes work, and involves many, many mistakes. But every day is a fresh start, with a new outfit and a new chance to use your wardrobe to make you look your best.

You get 365 chances per year to look good; So why not have a bit of fun while you do it.
